

Job Title: Propane Equipment Installer

Job Type: Full-Time

Schedule: Mon – Fri; weekends & OT available as necessary in winter months

Job Overview:

Downey Energy is seeking a skilled and dependable **Propane Equipment Installer** to join our team. In this role, you will be responsible for installing, maintaining, and servicing propane tanks, regulators, piping, and related systems for residential and commercial customers. Your work will be critical to ensuring the safety, functionality, and satisfaction of our clients.

Key Responsibilities:

- install propane tanks, regulators, piping, and related equipment per safety standards and manufacturer guidelines.
- Conduct thorough inspections and testing of propane systems to ensure proper function and compliance with safety regulations.
- Perform routine maintenance and repairs on existing propane systems.
- Communicate effectively with customers to assess their propane needs and recommend appropriate solutions.
- Troubleshoot and resolve system issues, including leaks and operational malfunctions.
- Maintain detailed records of installations, inspections, service visits, and deliveries.
- Ensure compliance with all applicable safety protocols, industry regulations, and company policies.

Requirements:

- Proven experience as a propane technician or installer with a strong understanding of propane systems.
- Solid knowledge of safety standards and handling procedures for propane installation and transport.
- Ability to read and interpret blueprints, schematics, and technical documentation.
- Excellent troubleshooting skills and strong attention to detail.
- Strong interpersonal and customer service skills.
- Physically capable of lifting heavy equipment (minimum 50 lbs) and working in various weather conditions.
- Valid driver's license with a clean driving record.

Benefits:

- Paid time off
- Health insurance
- Dental insurance
- Vision insurance
- Employee discounts

If you're looking to join a hardworking, safety-focused team and make a direct impact on the comfort and energy needs of our customers, we encourage you to apply today! 845-265-8262
